Contents

ovba	2
Index	3

ovba	<i>ovbars allows to parse the OVBA file vbaProject.bin which contains macro variables in Office Open XML files</i>
------	--

Description

ovbar_out(): Returns a list of macro sources found in the vba binary. ovbar_meta(): Returns a list of additional meta data of directories found in the vba binary. The latter is probably not useful for the user.

Usage

ovbar_out(name)

ovbar_meta(name)

Arguments

name	the path to the input file
------	----------------------------

Value

A named list with character strings. The list is sorted alphabetically.

Index
